BUFFALO INGREDIENTS

NATURAL CAFFEINE

Caffeine stimulates the central nervous system giving the body a sense of alertness as well as dilates blood vessels.

GUARANA

Guarana comes from a plant native to South America. Amazonians have used it for a long time to increase alertness and energy.

It's more dense in caffeine than coffee beans:

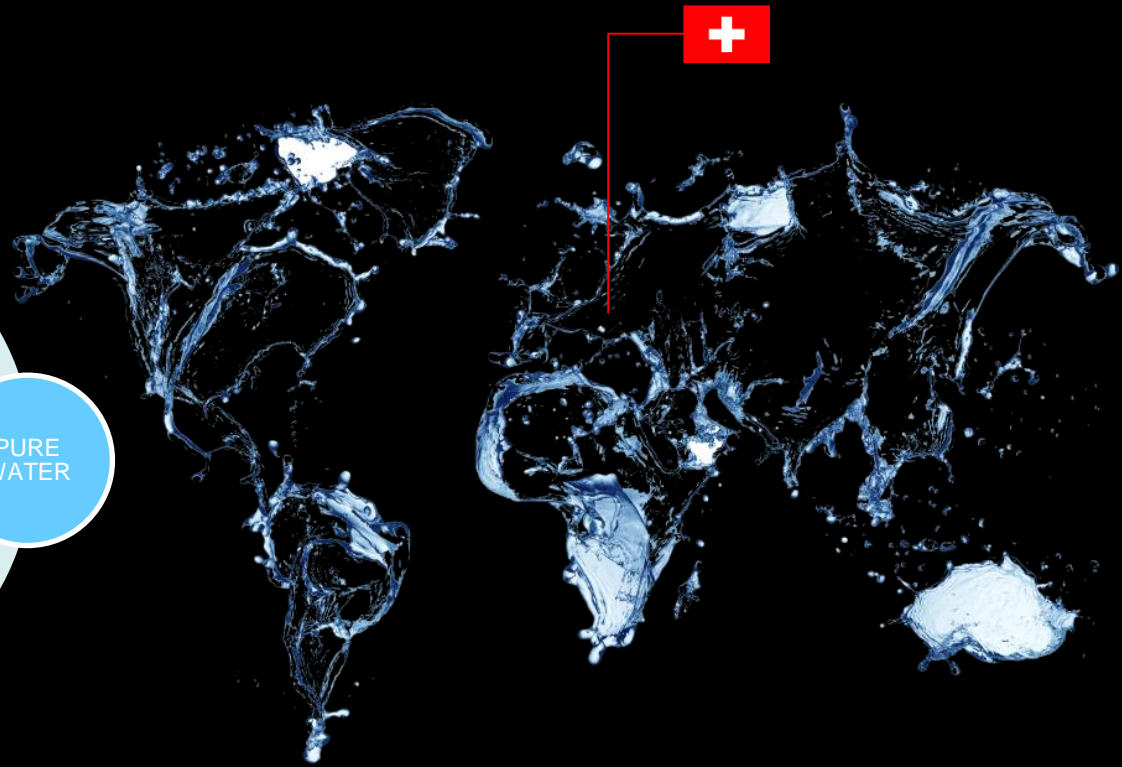

Guarana is 3-4% caffeine vs. arabica coffee which is 1-2% caffeine.

ACAI BERRYS

Acai berry comes from the Acai Palm tree which is found in South America. The berries are rich in antioxidants.

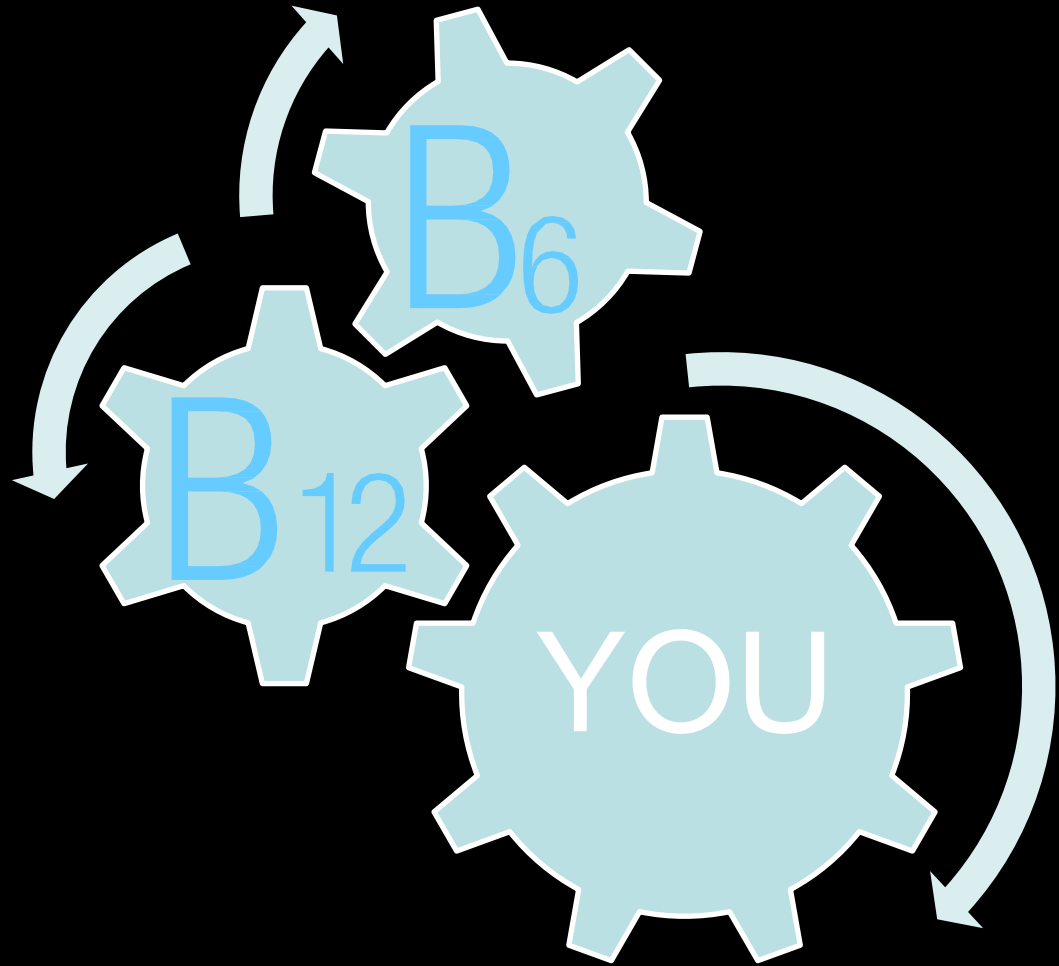

HOW THE DRINK IS PRODUCED

VITAMINS

B-group vitamins contribute to normal energy-yielding metabolism, such as the build-up and break-down of carbohydrates and proteins and contribute to normal mental performance (pantothenic acid) and the reduction of tiredness and fatigue (niacin, pantothenic acid, B6, B12).

B-group vitamins also play a central role in the brain; they contribute to the normal functioning of the nervous system.
